Subject: RE: MDHHS/EPA DUA modifications

Afternoon Darren –

I apologize for any confusion with the attached documents. The existing agreement that has been signed is only for *de identifiable* data. The marked-up word document is one we wish to utilize (or one substantially similar) in addition to that agreement but this time for the sharing of *identifiable* data with EPA. I think it may be easier to get some of our folks on the phone who might explain the necessity of this agreement and what our goal is in utilizing it. Do you have availability tomorrow at all?

Brittany

Hello Brittany,

I was forwarded your email (see below) and I am a bit confused. The agreement (attached pdf) has already been signed. The signed agreement covers a broad statewide project where we are collaborating to study lead particles in water. This effort has been in the works for well over a year. Whereas the edited Word file seems to be attempting to focus on Benton Harbor and there is discussion of PII, neither of which are or should be part of this project. The word file appears to be a different agreement and not one I initiated. Do you know where it came from or history behind it so I can do some follow-up?

Thanks, Darren

Subject: MDHHS/EPA DUA modifications

Afternoon Seth!

I've attached 2 documents to this email – the first is what I believe is an executed agreement between MDHHS/EPA. The second has some proposed changes that our environmental health staff have determined are important to address, particularly in light of the operations on the ground. Some of the main questions are how data is shared and protected and I kept their notations in text for you to see. Are any of these things that we can amend the agreement to reflect? I'd love your input when you are able. I have meetings most of this afternoon but will be available here and there – you can always reach my via email, of course.

Thank you very much!
